MAETASIT PITTATANANG

Junior Cyber Security Engineer | Fresh Graduate
Bangkok, Thailand | +66 88 198 0026 | thaemaetasit@gmail.com

PROFESSIONAL SUMMARY

Fresh graduate with a B.Sc. in Digital Technology (UTCC, 2026), targeting a Junior Cyber Security Engineer role. Built a hands-on PDPA data leak detection lab with Wazuh SIEM, Sysmon and a Python DLP-style scanner. Self-studied SSE components (CASB, SWG, DLP), EDR and ISO/IEC 27001/27701, and built a private local AI solution that keeps sensitive data off external cloud services. Experienced in user testing and client communication; a fast learner of new technology.

PROJECTS

PDPA Data Leak Detection Lab Personal project, Nov 2026

- Built a home SOC lab in VirtualBox: Wazuh 4.14 SIEM (manager, indexer and dashboard) on Ubuntu Server 24.04, plus a Windows 11 endpoint running the Wazuh agent and Sysmon that sends telemetry to the SIEM.
- Wrote a Python DLP-style scanner that finds Thai national ID numbers in .txt, .csv, .xlsx and .docx files (UTF-8 and TIS-620). It validates the check digit, masks IDs before logging and grades alerts by the number of IDs found.
- Compared to regex-only matching, the scanner reports 91% fewer false IDs on a 1,000-file synthetic test set. It missed no files and raised no false positives at high or critical severity.
- Built a folder and USB watcher that writes JSON events for the SIEM. Drafted custom Wazuh rules mapped to MITRE ATT&CK (T1052.001, T1567.002) and ISO/IEC 27001:2022 Annex A (8.12, 8.15, 8.16).
- Fixed and documented lab build issues: LVM disk sizing, a broken package state and Hyper-V versus VT-x performance.

Tools: Python, Wazuh, Sysmon, VirtualBox, Ubuntu Server, Windows 11, pytest

WORK EXPERIENCE

Transdev Co., Ltd. Aug 2025 – Nov 2025
Business Analyst / AI Developer Intern

- Developed a private RAG chatbot (React, LM Studio) on a local LLM, indexing complex documents to improve search accuracy while keeping sensitive data off external cloud AI.
- Evaluated chatbot answers against stakeholder requirements through user testing and turned feedback into improvements.
- Cleaned and transformed 190,000+ rows of raw traffic data with Python (Pandas) for analytical modeling.

Data First Co., Ltd. Aug 2024 – Apr 2025
Data Analyst / Front-end Developer Intern

- Cleaned and consolidated raw market data from multiple sources with Python and built interactive dashboards that turned competitive trends into decision-ready insights.

Production Company 2019 – 2020
Production Admin / Coordinator

- Served as the point of contact between clients and production supervisors, following each request through to on-time delivery.

EDUCATION

University of the Thai Chamber of Commerce (UTCC), Bangkok, Thailand 2022 – Apr 2026
Bachelor of Science in Digital Technology

SKILLS

- **Security Operations:** SIEM (Wazuh), Sysmon, Log Analysis, MITRE ATT&CK, Custom Detection Rules
- **Data Protection & SSE (self-study):** DLP (Trellix), CASB / SWG (Skyhigh), EDR (Trend Micro), Endpoint Protection (Symantec SEP), AI Security, PDPA, ISO/IEC 27001/27701
- **Systems & Development:** Python (Pandas, pytest), SQL, VirtualBox, Ubuntu Server, Windows 11, Local LLMs / RAG (LM Studio), React, Git
- **Languages:** Thai (Native), English (Conversational)
