PROFESSIONAL SUMMARY

Digital Technology graduate with over 1 year of internship experience in business analysis, data analytics and AI solution development. Skilled in requirement gathering, SQL, Python (data cleaning), Excel, Tableau and Power BI, with a structured, detail-oriented approach to turning business needs into data-driven solutions.

EDUCATION

University of the Thai Chamber of Commerce (UTCC), Bangkok Thailand **2022 – Apr 2026**

- Bachelor of Science in Digital Technology
- Relevant Coursework: Digital Business Operations

WORK EXPERIENCE

Transdev **Aug 2025 – Nov 2025**

Business Analyst / AI Developer Intern

- Gathered business requirements from users and translated them into a local RAG AI chatbot (React, LM Studio), improving internal information retrieval.
- Structured and indexed complex document data (PDF, TXT) to enhance search accuracy and reduce manual retrieval time.
- Evaluated AI model performance through user testing and feedback, ensuring the system met practical business needs.

DataFirst **Aug 2024 – Apr 2025**

Data Analyst / Front-end Developer Intern

- Cleaned and transformed raw market data with Python, then analyzed competitive trends and designed interactive social media dashboards to support data-driven strategic decisions.
- Extracted and evaluated FMCG media spending and Share of Voice metrics to identify key market trends.
- Collaborated with a cross-functional team to build a travel recommendation web application, focusing on user experience and user requirements.

Production Company **2019 – 2020**

Production Admin / Coordinator

- Coordinated cross-functional communication between clients and production supervisors to optimize production queues.
- Managed end-to-end customer order tracking via Excel databases, ensuring high data accuracy and on-time delivery.

SKILLS

- **Languages:** Thai (Native), English (Conversational)
- **Technical Skills:** Excel (Advanced), SQL (SQLite), Python (Data Cleaning), Tableau, Power BI (Basic), Data Analytics, React, Figma, Git, Basic Machine Learning (RAG/LLM)
